

DO YOU WANT TO BUILD A SNOWMAN?

———— DREAMBOX CHALLENGE ————

First, to build the **body** of our snowman, our class has to complete an average of 10 lessons per student. For example, if we have 24 students in our class, collectively, we need to complete 240 lessons.

Then, for every 5 more lessons we complete, we earn a new **accessory** for our snowman. Our snowman will be complete when we have earned 2 arms, a mouth, a nose, buttons, eyes, a hat, and a scarf. After building our body, we have to complete 40 additional lessons to build and accessorize our completed snowman!

Our snowman must be completely built for our class to earn 10 extra credit points! Only students that have completed the minimum of 10 lessons will be able to receive the extra credit points. The challenge started Fri. Dec. 6 and ends Thurs. Dec. 19.
